

ICE Presenter System

General FAQs

1) How does the ICE Presenter system benefit clients?

Using ICE Presenter will benefit the client by providing his/her audience with a slide-based multimedia presentation. This will enable clients to deliver both an entertaining and educational presentation to a global audience. Features such as audio and intuitive user interfaces bring an entirely new element to any website, presenting a unique form of communication in an exciting and informative media.

2) How can a client use the ICE Presenter system?

The client can use ICE Presenter for a large number of uses -- ranging from online help systems (w/ audio) to product launches to training seminars. You don't have to be in the office to give presentations; deliver live PowerPoint presentations from anywhere -- great for the global market.

3) Is it possible to add the ICE Presenter system into an existing website?

Adding a presentation to any website is extremely quick and easy. By simply adding a hyperlink, provided with each presentation you create, the system can be easily integrated. Neither the developer nor the user requires any advanced coding skills or software.

4) What is the cost of the ICE Presenter system for ICs?

The cost to the IC is \$300 US per presentation created; this includes hosting and bandwidth for one year. Value packages may be purchased at a cost of \$750 US per year, allowing up to three presentations to be created by the IC or client. Prices are subject to change, so please visit the Code Depot and MAPS for the most up-to-date pricing.

5) Where can I request product set-up?

Simply complete a product set-up request form, available for download in the Code Depot and send through the RMS to "Product Enquiries".

6) What file uploads can the ICE Presenter system provide?

The ICE Presenter system currently supports Microsoft PowerPoint formatted files (other media can be captured in PowerPoint and then uploaded to the system in PPT format).

7) Does the ICE Presenter system offer video streaming support?

Video streaming is not offered or supported by the ICE Presenter system at this time.

8) Where can I find more information on the ICE Presenter system?

You can find more information about the service by visiting the Code Depot.
